

ANCHOR

We live in a world of volatile and inflationary markets. Consequently, the value of your holdings in all existing currencies, whether you are a business or individual holding onto fiat or crypto, is always at risk and in constant decline.

This affects everyone.

WE BELIEVE THAT WHATEVER YOU HAVE EARNED IN YOUR LIFE AS A HUMAN BEING SHOULD NOT LOSE VALUE.

To make this vision come to life, we have undertaken the mission to create ANCHOR - the most stable currency in the world.

Anchor is designed as a two-token economy that consists of the **Anchor Token**, the system's main currency and payment token, and the **Dock Token**, a utility token that stabilizes the system and enables the Anchor Token to maintain a stable peg of value to its reference unit - the **Monetary Measurement Unit (MMU)**.

The MMU is an index that reflects the value of the global economy, as the most universal, stable and predictable pegging mechanism available today.

The MMU is calculated through a proprietary formula developed by **The Anchor Company**, taking into account relevant and publicly available macroeconomic data and indicators.

The Anchor, designed as a stable currency by way of the mechanism outlined above, provides a solution to the central issues of the global macroeconomic system - **transparency, guarantee, predictability and trust**.

By developing into a stable currency, Anchor will become an accurate and dependable measurement unit of monetary value in the world; The most trusted stable cryptocurrency on the market; and a global financial standard for products, services and platforms.

This will ensure that the stakeholders in the Anchor Economy **preserve and enhance the value of their holdings over time**, and are able to rely on a **stable and predictable value peg** as a platform on which they can build their products and services, with reduced risk and profit from participation in the system.

Anchor investors, validators and partners are additionally incentivized with **presale discounts** for their crucial role in the early stages of Anchor's development.

NOTE: The disclaimer for the Anchor Shortpaper and Whitepaper is available in the full version of the Anchor Whitepaper [here](https://theanchor.io/anchor-whitepaper) (<https://theanchor.io/anchor-whitepaper>).

This version of the Anchor Shortpaper was published on February 4th , 2019.
